PART A (Continued)

Section 2 – Project Details

2.1 Please provide a description of the background with references to relevant literature (250 words maximum):

Everyone likes to dress attractively and stand out. And also, every photographer and fashion designer like to make their work strong and eye-catching. As photographers and fashion designers, this is the place where they get into many problems when selecting colour themes for their outfits without proper experience. Because most of the time photographers face the problem when selecting the proper costume colour suitable to the background. Because they do have not much experience in costume colour matching and fashion designing. And it is much expensive for them to hire a well-experienced fashion designer. Fashion designers also face some problems when selecting exact colour themes. Even normal people also face many problems when selecting their costume colour according to their skin colour and background colour or time of the day. Because normally they don't hire the designers or expert knowledge due to high-cost charges. On the other side, such countries do not have enough well-experienced domain experts. Because of those reasons people need some kind of help when doing their things related to this subject. Also, it is a risk to do experiments on this subject when working with clients.

2.2. Please provide a brief description and the aims of your study (250 words maximum):

The goal is to develop, test, and evaluate a software system that will assist photographers and fashion designers in choosing the most appropriate colour theme for their clients' costumes.

2.3. Please outline the design and methodology of your study (include details of the selection and recruitment of participants (if any) and details of any invasive (e.g. blood samples, inhalation/ingestion of food and/or non-food products (in abnormally higher or lower levels than normal or a different form), or intrusive (e.g. questionnaires, focus groups, interviews, etc.) procedures [attach extra information as necessary] (400 words maximum in total):

In my project, I have to use data sets of images only. These can be achieved from questioners. There are no participants or recruitments which are take for this project.

2.4. Timescales

Start Date (DD/MM/YY): 21/09/2021

Estimated duration of work: 1 year

Section 3 - RISK OF HARM				
NOTE 1: Where indicated below applicants should check if the research will require ethical approval from a National Research Ethics Committee via the Integrated Research Application System (IRAS) - nres.queries@nhs.net - http://www.hra-decisiontools.org.uk/ethics/ NOTE 2: The University of Westminster holds a Human Tissue Authority Licence – This licence is specifically for tissue stored at 115 New Cavendish Street in accordance with the terms of the licence – Advice must be obtained from the University Human Tissue Designated Individual (N.Presneau@westminster.ac.uk)

What to do next:

- **If you have answered NO to questions 1-18 (inclusive) and YES to questions 19-25 (inclusive)**, you do not need to complete the Full Research Ethics Approval Form (Part B). Please keep this form for your records, and do not submit to **Faculty Research Ethics Committee (FREC)** unless you require ethical consideration of your study, regardless of ethical implications, by an external body (question 26 has been answered YES).
- **If you have answered YES to any of the questions 1-18 (inclusive) or NO to any of the questions 19-25** the Full Research Ethics Approval Form (Part B) **MUST** be submitted including Cover Sheet, Part A and Part B of the application form plus any required supplementary documents to the Secretary of the relevant Faculty Research Ethics Committee (FREC).
- If you are applying for external Ethical Approval, please send a *copy* of the Conditions/Approvals letters to the **University Research Ethics Committee (UREC)** Secretary (this may include the original ethical application(s)). Where the external ethics committee/body has equal standing or primary jurisdiction, e.g. another University Research Ethics Committee or a National Research Ethics Committee, any approval will normally be received and noted by the University of Westminster Research Ethics Committee and further consideration may not be required. Where the external committee does not have equal or higher standing than the University Committee then the full ethical approval process at the university may still be required. Additional institutional compliance issues may need consideration by UREC.
- All Applications (dated, signed and authorised) and supplementary information or External Approvals should be sent to the University Research Ethics Committee (UREC) Secretary in *electronic format with a version number, document name and date and the Principal Investigator (or Undergraduate/Postgraduate Taught Student) name*. On receipt your application will be issued a unique reference number
- All new Applications should be submitted to a Research Ethics Committee (FREC or UREC) Secretary a minimum of 10 working days in advance of the Committee meeting date (earlier submission is recommended so that applications can be pre-vetted and obvious issues addressed before the application is considered by the Committee).
